Vocabulary

CASEMENT - a window sash that opens on hinges at the sides.

CLERESTORY - a wall of a room or of a building that rises above the roof and contains windows.

FANLIGHT - a semicircular window (often placed above a door or another window).

FENESTRATION - the arrangement and design of windows and doors in a building.

LIGHT - an opening in a window

MUNTIN - a strip separating panes of glass in a sash.

PANE - a piece of glass in a window

SASH - the framework of a window in which panes of glass are set.

TRANSOM - a window above a door (or a horizontal crossbar in a window or between a door and a window).

TRIPARTITE - a window composed of three parts.

Some types of windows...

Double Hung: Windows divided into two main sections. One section can

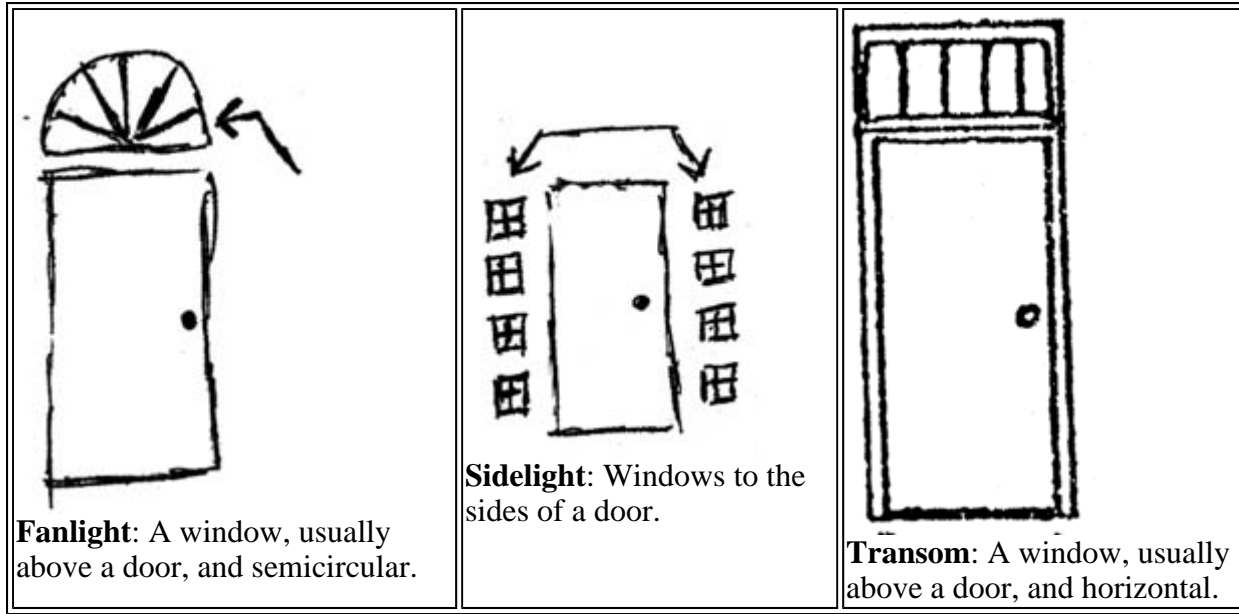

Fixed: Windows that are

slide up and down past the other one.

Casement: Windows that open on hinges at the sides.

designed to not open.

Some special windows...

Some dormer windows...

Dormer windows are windows that stick out of a roof and have a roof of their own. They can have different names, depending on what type of roof they have. Shown below are two examples:

Some examples of different types of window sash...

**6/6**

6 over 6 sash is common in older buildings. In the old days, big pieces of glass were expensive, so windows were made from lots of smaller pieces.

**9/6**

9 over 6 sash is also common in older buildings for the same reasons.

**4/4**

These windows became more common after the Civil War.

**2/2**

This type of window is seen a lot in modern buildings.

**3/1**

This style was a popular feature on [Bungalow](#) homes.

**4/1**

This style was also a popular feature on [Bungalow](#) homes.

**1/1**

This window is very common on modern buildings.
